### What this means

Economic nexus is a sales-tax obligation triggered when your sales into a state cross that state's revenue or transaction threshold. A "Triggered" state below means the figures you entered have crossed its threshold, so you may be required to register, collect, and remit sales tax there. "Approaching" states are within 80% of a threshold and worth monitoring. Confirm specifics with each state's department of revenue and a qualified professional.

#### Informational purposes only — not legal or tax advice.

This automated estimate is based solely on the figures you provided and published state thresholds, which change over time. Verify before relying on it.
